# Institutional changes for faster SDG

## Dedicated institutional structures

### SDG Coordination Centres/ PMU for SDGs

- Dedicated team of 5-10 personnel reporting to ACS, Planning
- Handles all SDG-related activities such as vision document, indicator frameworks, dashboard, capacity building, reports, budget linkage, coordination with departments and NITI Aayog etc.
- Examples: Andhra Pradesh, Haryana, Karnataka, Odisha, Punjab, Nagaland, Uttarakhand

## Support from NITI Aayog

- Jammu and Kashmir: Development of project for SDG Coordination Centre and facilitation of funding support through Strengthening of Statistical Systems (SSS) scheme of Gol
- Odisha: Facilitated setting up of PMU for SDGs
- Tamil Nadu: Enabling setting up SDG Coordination Centre with UNDP
- Himachal Pradesh: Facilitating funding support for SDG initiatives through GIZ-BMZ

**284 indicators**

**National Indicator Framework**

Government of India

Ministry of Statistics and Programme Implementation

**NITI Aayog**

**115 indicators**

Used from NIF for SDG India Index

**State Indicator Framework**

States develop SIF, aligned to NIF but more contextualized as per State needs

Ranking of states on SDGs

1. Monitoring progress on goals at state/district level and below
2. Foster peer learning and healthy competition
3. Enable Data driven decision making

A map of India is shown in black silhouette. The state of Meghalaya is highlighted in a light blue color. A dark blue rectangular box is positioned at the top center of the map, containing white text.

# Monitoring progress of localisation: SDG India Index

Based on globally accepted SDSN methodology

# Treatment of Indicators and Data Sources (2020-21)

1

## The indicators must be aligned with Global Indicator Framework (by UN) and National Indicator Framework (by MoSPI)

To align with the global and national priorities and data systems, the SDG India Index uses GIF and NIF as the universe of indicators from where those with State-level figures are adopted

2

## Only national-level data sources have been used, for uniformity of methodology of data collection and inter-State comparability

Sources used: National survey reports, MIS portals of ministries, index reports by ministries

State departments are urged to update/ reconcile data in their corresponding Union Ministries' dashboards/ portals

State DES can play an important role in reconciling State-level data in the various ministries' survey reports

3

## 88% of indicators used in 2020-21 are outcome-based; only 12% are scheme-related

Only 14 out of 115 indicators are related to various central schemes. The others are outcome indicators such as “percentage of HHs with at least one member covered by health insurance”, “percentage of HHs living in katcha houses” etc.

Flagship schemes covered: MGNREGA, PMMVY, NFSA, SBM (U), SBM (G), Saubhagya, PMJDY, Ujala

# Treatment of Indicators and Data Sources (2020-21)

4

## **81% of the indicators used in 2019-20 have been retained in 2020-21**

Out of the 100 indicators used in 2019-20, 81 have been used in 2020-21. Some indicators have been added, based on new data availability at State level, for more comprehensive coverage. As a result, the number of global targets covered has increased from 54 to 70.

5

## **Data for 80% of the indicators are sourced from last three years (since 2018-19)**

Some latest national-level survey reports could not be used as they cover only a limited number of States.

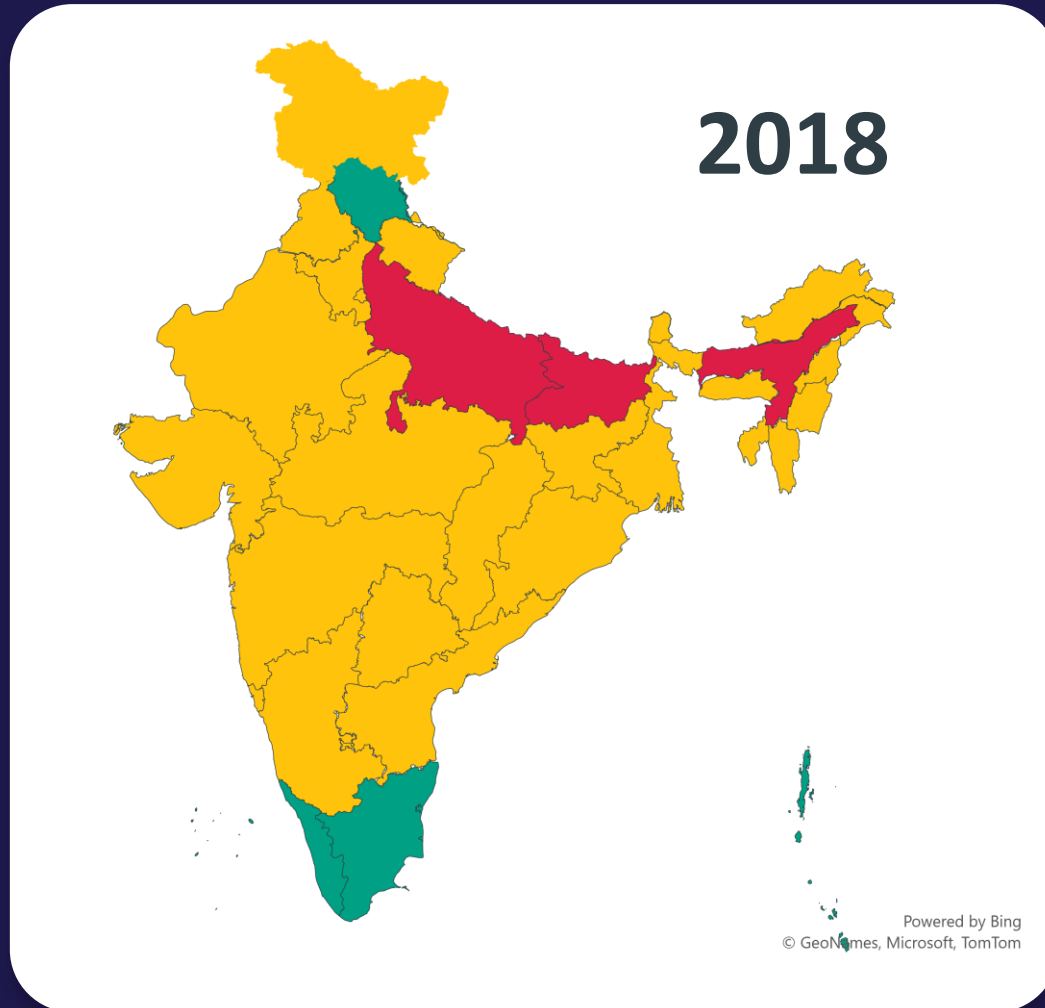

6

## **SDG India Index is not a State Government scorecard but emphasizes on a whole-of society-approach of government, civil society, private sector and citizens**

The Index is not a reflection of a State Government's performance or performance of any one department. It underscores how achieving the Global Goals requires a multisectoral approach which is not only whole-of-the-government but also whole-of-society, including the private sector

# Identification of Reform Areas and Reform Actions

Action Plan for for fast-tracking SDG outcomes

## How to improve localization?

### Awareness development on SDGs:

Sensitizing elected representatives and officials at the state/district/local levels, as well as civil society organizations and communities.

### Aligning local development plans with SDGs:

Local governments – both rural and urban – are best placed to 'put people first' and ensure 'no one is left behind' and can prioritise and align their development plans with SDGs

### Identifying the State-specific indicators for monitoring of the SDGs :

Based on the National Indicator Framework, States can identify indicators that are unique to them for monitoring the SDGs.

### 'Leave No One Behind':

States can conduct surveys for vulnerability mapping, and start special initiatives to address the needs of the vulnerable population groups

### Aligning the State budgets with the SDGs:

Aligning budgets with SDGs facilitates identification of resource gaps and preparation of multipronged strategies to rationalize expenditure prioritization, augment revenue and improve resource efficiency.

### Building partnerships:

States are increasingly building partnerships with various stakeholders, such as multi-lateral organizations, academia, civil society organizations, and private sector to achieve the whole gamut of development targets.

An aerial photograph of a lush green valley. The foreground and middle ground are dominated by terraced rice fields, which are vibrant green and arranged in curved, stepped patterns. Several small, simple houses with dark roofs are scattered throughout the fields. In the background, a large, steep mountain is covered in dense, dark green forest. The sky is overcast with soft, grey clouds. The text "Thank You!" is centered in the middle of the image in a white, sans-serif font. In the bottom right corner, there are several purple, brush-stroke-like lines.
